Encampment Philosophy and Purpose

The Minnesota Wing Summer Encampment's primary mission is to "provide the most significant week of training in a cadet's CAP career." By creating an atmosphere of strict discipline and constant energy, we engage and motivate the cadet to achieve their full potential and beyond.

All of this training is conducted by advanced cadets who have been trained in the methodologies and theory of training and education. Being on staff is the advanced cadet's opportunity to try out their "leadership wings" and learn by doing. Like no other activity, cadet staff at encampment are given the latitude to make their own decisions and learn from the rewards and consequences that come with those decisions. This entire concept is embodied in the "Cadet Training Group."
